Bruno Pedroso de Oliveira

Bertioga, SP, Brazil · +55 13 99800-0912

Senior Software Engineer | AI Agents · Backend · Distributed Systems · Tech Lead dev.bpedroso@gmail.com · linkedin.com/in/b-pedroso · github.com/BrunoPdOliveir4

Professional Summary

Senior Software Engineer specializing in **AI agents, multi-agent orchestration, and scalable backend architecture**. Hands-on experience with LangGraph, ADK, and MCP, integrating LLMs into distributed systems in production. Strong background in Python, TypeScript, event-driven architecture, and cloud-native applications. Acts as Tech Lead — driving architectural decisions and leading cross-functional teams to deliver reliable, production-ready solutions.

Technical Skills

Languages: Python, TypeScript, Go, JavaScript **Databases:** PostgreSQL, MongoDB, Redis, MySQL

AI & Agents: AI Agents, Multi-Agent Systems, LangGraph, ADK, MCP, LLMs, RAG, LangChain, Prompt Engineering

Backend & Architecture: FastAPI, Node.js, NestJS, REST APIs, GraphQL, Microservices, Event-Driven, Clean Architecture, SOLID

Messaging: RabbitMQ, Apache Kafka, AWS SQS **Security:** OAuth2, JWT, RBAC

Cloud & DevOps: AWS, Docker, Kubernetes, GitHub Actions, CI/CD, Pytest, Jest

Professional Experience

Senior Software Engineer / Tech Lead Jun 2026 – Present

Accenture *São Paulo, Brazil*

- Led technical direction and architectural decisions on enterprise projects for global clients, coordinating cross-functional Engineering, Security, and Product teams.
- Architected scalable, cloud-native backend solutions in Python and TypeScript, producing detailed technical documentation and solution diagrams.
- Defined code quality, testing, and continuous delivery standards; communicated technical trade-offs and risks to both technical and non-technical stakeholders.

Software Engineer – Backend & AI Dec 2025 – Jun 2026

NextIA *Remote*

- Designed and built a **multi-tenant AI platform** with **intelligent agent orchestration** using Python, FastAPI, and TypeScript.
- Implemented **multi-agent workflows** with LangGraph, ADK, and Model Context Protocol (MCP), integrating LLMs with external AI engines and third-party tools.
- Built a preference configuration interface for skills and sub-agents; developed plugins and extensions for LLM-based applications.
- Designed event-driven architecture with RabbitMQ and async processing; automated CI/CD pipelines with GitHub Actions, Pytest, and Jest.

Backend Software Engineer May 2025 – Dec 2025

Wee Find Pro *Remote*

- Designed scalable REST APIs and backend services with Node.js and TypeScript (MVC); implemented OAuth2 authentication with social login and advanced third-party API integrations.
- Built internal libraries that standardized implementation practices across projects; applied parallel processing and custom recommendation algorithms to improve platform performance.

Education

MBA in Software Architecture · Full Cycle 2025 – 2027

B.Sc. in Commercial Software Engineering · Jala University 2023 – 2027

Certifications & Languages

Generative AI APIs for Practical Applications · Introduction to Ethical Hacking · Software Engineer (Internship & Full Role)

Portuguese – Native | **English** – Full Professional Proficiency
